Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The best prior art of record which is Tsirtsis et al Heinonen et al, and Rajahlme show the limitations of “a first transmitter configured to transmit first instruction information, which instructs one of the plurality of transfer devices to transfer the packets to the mobile terminal, to an anycast address assigned in common with the plurality of transfer devices; and a receiver configured to receive specification information specifying a nearest transfer device, which has a shortest distance from the first access router device on the network among the plurality of transfer devices, when the first instruction information is transmitted to the nearest transfer device based on the anycast address”.

However, the best prior art of record fails to teach the following limitation “wherein when the mobile terminal executes a handoff from the first access router to a second access router, and an on-link care of address used by the mobile terminal is changed from a first on-link care of address to a second on-link care of address based on the handoff, the mobile terminal performs unicast transmission to transmit instruction information that includes the second on-link care of address to be used by the mobile terminal after the handoff to the nearest

Art Unit: 2617

transfer device having a shortest distance from the first access router to which the mobile terminal was connected prior to the handoff”.

Therefore, the currently pending are considered non obvious and thus allowable.

Therefore, claims 1-13 are hereby allowed.
